01 ABOUT

I build web applications end to end — from React interfaces down to Spring Boot services and MySQL schemas. At Atos, I've spent the past year shipping full-stack features for VE.AI, an enterprise product used by hundreds of people daily, and picked up a habit of caring as much about load times and API design as I do about the UI. I'm AWS certified and always mid-way through learning the next layer of the stack.

FRONTEND

React.js

Next.js

Redux

Tailwind CSS

BACKEND

Java

Spring Boot

Node.js

Express.js

Hibernate

DATA & CLOUD

MySQL

MongoDB

AWS

Docker

Git

02 EXPERIENCE

○ Full Stack Developer — Atos

VE.AI Product — Full-Stack Web Application & API Development · Chennai, India

- Built and maintained responsive features with React.js, Node.js, and REST APIs, supporting 500+ daily active users.
- Shipped features 20% faster by working closely with design, QA, and product in an Agile/Scrum rhythm.
- Integrated secure payment gateway APIs, cutting transaction processing time by 15%.
- Optimised frontend rendering and backend queries, reducing overall load time by 30%.
- Delivered 20+ web modules using Java, J2EE, Spring, Hibernate, and MySQL, contributing to a 30% lift in client satisfaction.
- Modernised legacy monolithic services and resolved critical incidents, cutting downtime by 25%.

03 PROJECTS

Enhancing Dementia Support through Deep Learning Predictions

- Designed and built the application UI for a dementia support solution, translating AI/deep-learning outputs into clear, caregiver-friendly screens.
- Integrated ResNet-101 MRI scan analysis results into the front-end workflow alongside the backend and AI teams.
- Delivered caregiver-focused features: family tree management, real-time GPS tracking, and automated medication reminders.

HTML5 · CSS3 · JavaScript · Figma · Java · MS Excel

Full-Stack E-Commerce Web Application

- Built a product catalog, cart, and order-management flow with React.js on the front end and Node.js/Express.js on the back end.
- Designed REST APIs and a MongoDB schema for products, users, and orders, with JWT-based authentication.
- Deployed on AWS (EC2/S3) with a responsive Tailwind CSS interface and Git-based version control.

React.js · Node.js · Express.js · MongoDB · JWT · Tailwind CSS · AWS

04 CERTIFICATIONS & EDUCATION

AWS Certified Developer – Associate

Amazon Web Services · June 2023

Node.js + Express.js

September 2024

Advanced React.js + Next.js

March 2026

Master of Computer Applications (MCA)

Anna University, Chennai · Expected 2027

Bachelor of Computer Applications (BCA)

Saradha Gangadharan College, Pondicherry University · Graduated 2023
